EDUCATION

University of Central Florida

Bachelor of Science in Computer Science; 3.5 GPA

Orlando, FL

Expected Dec. 2027

- Honors: UCF Scholars Award, Dean's List
- Involvement: Knight Hacks and Project Launch Participant

University of Central Florida

Associate in Arts

Orlando, FL

June 2024 – April 2025

EXPERIENCE

Repair Technician

UDT

Mar. 2026 – Present

Orlando, FL

- Diagnose and repair hardware and software faults across a range of laptop makes and models, performing component-level work on screens, batteries, keyboards, storage drives, and system boards
- Track and manage repairs end to end in Odoo, recording diagnostics, parts usage, and status updates to keep ticket records accurate and turnaround on schedule
- Run post-repair diagnostics and quality checks to confirm full functionality before each unit is returned to the customer

Personal Technical Experience

Independent

2020 – Present

Orlando, FL

- Self taught, personal experience building, repairing, and troubleshooting PCs and laptops
- Experience fixing consumer electronics for friends, family, and coworkers, including hardware diagnosis and general troubleshooting
- Experience installing and configuring Windows and Linux systems, including dual-boot environments with GRUB and systemd-boot

PROJECTS

UVULITES - NFC Card Game | C, SQLite, Raylib, Arduino

Feb. 2026 – Present

UCF Project Launch 2026 Hackathon Winner · Open Sauce 2026 Exhibitor

- Built a two player strategy game in C with Raylib, using Arduino NFC readers to let players scan physical cards and trigger in game units and spell effects
- Developed the split screen game view, including rotated player perspectives, procedural biome maps, and layered sprites for flexible card visuals
- Created a data driven card system with SQLite and JSON so card stats, abilities, and balance changes could be updated without recompiling the game
- Built tools to manage card editing, biome creation, NFC card enrollment, serial input handling, scan debouncing, and support for multiple NFC readers
- Prototyped custom NFC reader controllers by combining soldered electronics with 3D modeled and 3D printed enclosures

TECHNICAL SKILLS

Languages: Java, C, C++, Python, SQL

Web: HTML, CSS

Databases: PostgreSQL, SQLite

Libraries / Frameworks: Raylib

Developer Tools: Git, Docker, Vim

Embedded / Hardware: Arduino, NFC integration

CAD / Digital Fabrication: 3D modeling, 3D printing
